

COVID-19 Statement

Croft Environmental Services Ltd is complying with all UK Government recommendations regarding the control and limiting the spread of the COVID-19 (Corona) virus and the management whilst continuously monitoring the evolving situation are able to carrying on trading as usual by as far as possible reducing contact with customers and splitting up administration staff into office and home working teams and our outside workforce teams minimising contact with each other.

In addition to the already high standards of cleanliness that our equipment is currently maintained this shall be reinforced with an even more rigorous disinfecting regime.

With over 36 years' experience of working within an industry that specialises in the containment and prevention of the spreading and removal of deadly contaminated materials, we are now able to offer additional services in the form of disinfecting and deep cleaning of buildings and property in a controlled way utilising our equipment and our expertise along with our industrial standard RPE and PPE.

Whilst it is impossible to guarantee that whatever control measures are taken will prevent the spread of Coronavirus (particularly given the limited knowledge of this virus at the moment) it is sensible to presume that deep cleaning and disinfecting of surfaces within buildings will be beneficial and we would be happy to discuss any particular requirements that you may have.

As always, the safety and wellbeing of our employees, customers and suppliers will remain our top priority.
